SAIRA BIBI

Web Developer

sairabibibsit2136@gmail.com | Dera Ghazi Khan, Punjab, Pakistan | linkedin.com/in/saira-bibi

PROFESSIONAL SUMMARY

Web Developer with 1+ year of hands-on experience building responsive, production-quality web interfaces and full-stack applications using React.js, Next.js, TypeScript, Node.js, and Express. Skilled in creating clean, accessible UIs with Tailwind CSS, Material UI, and HeroUI, adding polished interactivity with Framer Motion, and building RESTful APIs backed by MongoDB/Mongoose. Comfortable integrating REST APIs, collaborating in cross-functional teams, and delivering client-facing features under real-world deadlines.

WORK EXPERIENCE

Frontend Developer — MaxRemind Inc.

Jan 2026 – Present | Dera Ghazi Khan, Punjab, Pakistan

- Build responsive, user-friendly web interfaces using HTML, CSS, and JavaScript, following structured, maintainable coding practices.
- Develop frontend applications in React.js, focused on reusable and maintainable component architecture.
- Use Material UI (MUI) to deliver clean, consistent, and responsive UI layouts aligned with design best practices.
- Integrate RESTful APIs to fetch, display, and manage dynamic data across frontend applications.
- Use Postman and Swagger to test, debug, and document API endpoints during frontend integration.
- Implement responsive designs optimized across mobile, tablet, and desktop breakpoints.
- Contribute to production-level codebases, working within established version control and code review workflows.
- Collaborate with team members on requirements gathering, debugging, and feature implementation.

Frontend Developer — Codebotx

Sep 2025 – Dec 2025 | Dera Ghazi Khan, Punjab, Pakistan

- Built modern, responsive web interfaces using Next.js and React.js, prioritizing clean and intuitive user experiences.
- Developed reusable, scalable UI components with Tailwind CSS to maintain design consistency and speed up development.
- Implemented fully responsive layouts optimized for mobile, tablet, and desktop devices.
- Worked with HeroUI and modern component libraries to build professional, customizable interfaces aligned with UI/UX best practices.
- Added smooth animations, transitions, and micro-interactions with Framer Motion to enhance user engagement without compromising performance.
- Took early ownership of client-facing project work, demonstrating fast ramp-up and adaptability.
- Delivered pixel-perfect UI aligned with design specs, working closely with senior developers and designers.

PROJECTS

- **Management Information System** (Present) — End-to-end HR platform managing employee records, attendance, leave requests, job postings, interview scheduling, and applicant tracking in one centralized system.
- **Codebotx Company Website** (Dec 2025) — Marketing website for a services-based company, built with a focus on responsive layout and clean UI.
- **Web Security Scanner** (Nov 2025) — Tool that analyzes a given URL to flag vulnerabilities, malware, and harmful content using automated scanning.

- **Wayve** (Oct 2025) — Student-focused marketplace enabling campus communities to buy, sell, and rent items.
